Subject: China Exhibitions Follow Up

Dear Your Excellencies,

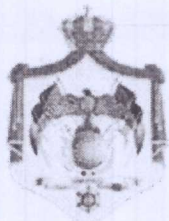

Based on the political discussion during the China visit, a special focus was given on enhancing the quality of trade and increase Chinese imports of high quality products from Jordan. High quality trade can also enhance Jordan's visibility in terms of tourism promotion, industrial and services export and access to technologies that can be part of our follow up actions.

Accordingly, we have conducted a quick research on upcoming exhibitions till the end of 2026, that may contribute to the above. We highly appreciate your feedback on how can we utilize these platforms to build on the visit outcomes and openness, noting that we would require your feedback on the plans to participate directly or through private sector on these exhibitions, if any. This will help us extend the support needed in following up on any specific asks in going forward.

Please note that the 40th Canton Fair was Discussed with the President and mentioned in the attached list.

Also, kindly note that some exhibitions maybe too soon to participate in (Marked in Red).

Best Regards,
